

TNP Helpdesk Guidelines Document

Section B: Online Assessment (OA) Guidelines

General Structure: Aptitude (Quant + Logical), Coding (DSA), and MCQs (CS fundamentals).

Product Companies (AWS, Microsoft, Adobe): 2–3 medium to hard DSA questions. Focus on graphs, trees, DP, sliding window. Aim to solve at least 2 completely.

Analytics / Consulting (Deloitte, PwC, Moody's): Aptitude-heavy, SQL basics, case-based MCQs. Speed and accuracy are crucial.

Core Companies (STMicro, Honeywell): Core CS subjects like OS, DBMS, Networking with 1 easy coding question.

Startups / Small Companies: Easy coding, practical tasks, sometimes assignments. Focus on real-world problem solving.

Section C: Interview Guidelines

Technical Interview: Focus on problem solving, CS fundamentals, and projects.

Product Companies: Deep DSA questions, optimization, follow-ups, sometimes system design.

Consulting / Analytics: SQL queries, case discussions, and resume-based questions.

Core Companies: Deep understanding of OS, DBMS, networking or electronics (for ECE).

Startups: Project-based discussion and practical implementation ability.

HR Interview: Questions like 'Tell me about yourself', 'Why this company?', strengths, weaknesses, and situational behavior.

Section D: Placement Sitting Guidelines

General Rules: Once selected, you may not sit for similar category companies. Dream offers may remove you from the process.

Attendance: Must attend all rounds if shortlisted. Skipping rounds can lead to penalties.

Do's: Carry resumes, dress formally, be punctual.

Don'ts: Do not miss OA after registering, do not leave interviews midway, avoid fake information on resume.
